P R O F I L E

I'm a self-taught developer. my journey began the day I wrote the first line of code in C. I knew that I was hooked. And my passion for programming lead me to ask a question: **What's going on under the hood ?**

 This question made me search and learn more. Starting with C to Assembly, which help me a lot to master problem solving as well as the ability to learn fast.. I'm looking for the right opportunity to develop my career an learn new things.

I switch to the built

P R O J E C T S

Safe pass - password manager

it's an app that manages your password, and store them in an sql db. I built it using nodejs and express in the backend and React for the front-end. for more info about this app checkout my personal site.

Low level shell

A simple stupid shell built in C, it can perform almost any command expect for the build in ones. For more info check out my personal site.
